

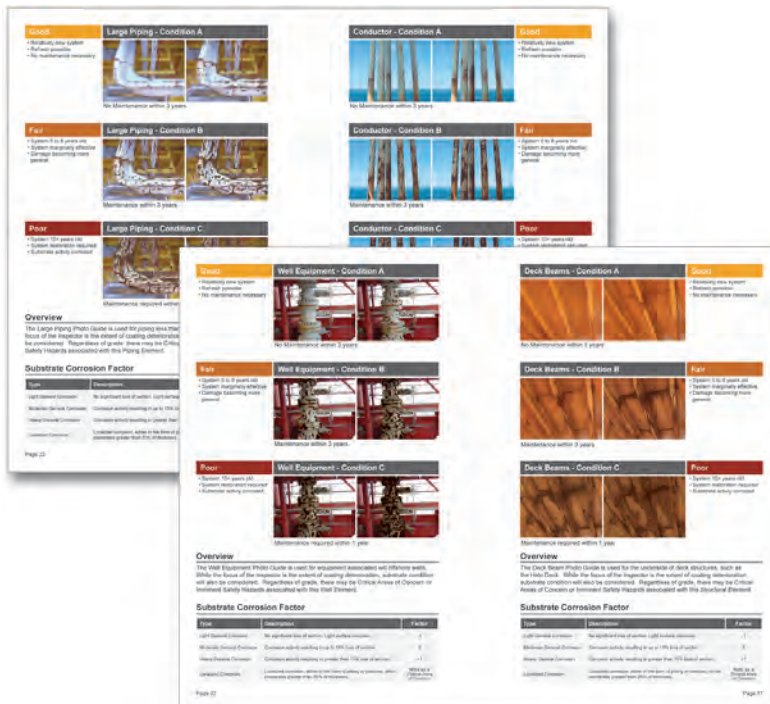

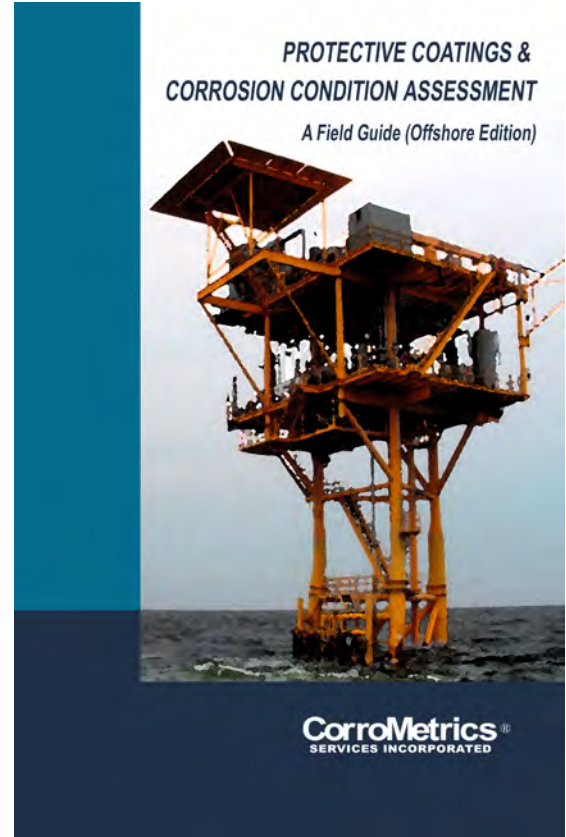

Photographic Assessment Guide

for Protective Coating & Corrosion Assessment Evaluation
A Field Guide (Offshore Edition)

- Used as an aid for consistent application of condition evaluation criteria.
- Photographic plates illustrate corrosion and coatings degradation for structural, piping, equipment, and wells.
- Includes photographic plates using the MMS A-B-C grading system for Level I inspections currently provided to MMS inspectors.
- Identifies Critical Areas of Concern and Imminent Safety Issues.
- Guide pages are laminated and coil-bound to withstand the rigors of field use.
- Custom photo plates can be created for individual corporate corrosion control programs (additional charges apply).
